Township of NIPISSING

"Life the way it should be" ESTABLISHED 1888

TOWNSHIP OF NIPISSING

STAFF REPORT ON LANDFILL

FROM: Dan MacInnis
DATE: October 20, 2026

Mattress Recycling

We have shipped out two loads of mattresses and box springs, totalling 200 mattresses and box springs, at a cost of $12.48 per item. Transportation costs are $1,640.00 per load, bringing the total cost to the Township to $28.88 per mattress. The landfill disposal fee is $27.00 per mattress or box spring.

This program will help reduce the amount of landfill air space consumed by mattresses or box springs each year while providing a cost-effective alternative to landfilling them.

Annual Shredding

Annual shredding was completed last week. This program reduces the volume of bulk items to approximately one-third of their original size, helping conserve valuable landfill air space. This program in the past years has been revenue neutral.

While shredding is underway, one staff member pushes and compacts the shredded material over the household garbage, using it as cover material. We also save money by excluding mattresses from the shredding process, as they are difficult to process through the shredder.

Annual Landfill Survey

The annual survey will be completed next week at both landfills. The surveys are conducted at the same time each year, following shredding and before snowfall, to ensure accurate and consistent measurements from year to year.

Refrigerator Recycling

A total of 50 refrigerators were received at the landfills over the past year. These units were degassed last week, crushed, and shipped out for metal recycling.

The landfill charges $40.00 per refrigerator, while the Township's cost for degassing is $24.50 per unit.

Scrap Steel Revenue

To date, the landfill has generated $5,445.45 in revenue from scrap steel.
